

February 28, 2008  
Minutes

At the February 28th meeting we had 9 members and one guest. Kathy brought along her husband as the guest. Kathy also brought pizzas and Rick and his wife provided refreshments. The first hour of the meeting was spent going over the new proposed Rules of Competition. What is great is the document has incorporated so many members' ideas and is fast becoming something I think all the membership can live with and be proud of.

I promised to incorporate the changes from the meeting notes and send it out to the membership for review. I hope to have this completed very soon as I would like the club to vote on accepting the document and then implementing the changes.

I also hope to then move on to the club Charter and start the process of creating a new and better Charter for the club.

After we completed the discussion on the Rules of Competition, Mark Hamilton set up and provided a program and a prospective on the use of small digital pocket cameras. He also discussed photographers who have created some very interesting works using both film and digital cameras. Mark provided a digital slide presentation as part of his program.

After Mark's program I gave a very quick look at GIMP, a free alternative to Adobe Photoshop and Lightroom.

Remember, the subject for our photo competition on March 13 is "LOVE".

Respectively,

Mike Adkins,  
President
